

qEEG Screening of Non-clinical Nature

s9001	Functional state of the brain (for ages above 19 years old; mature brain)
s9002	Biological age of the brain (for ages above 20 years old; mature brain)
s9003	Personality features
s9004	Professional occupation predisposition
s9005	IQ characterisation and creativity/giftedness predisposition
s9006	Stress levels characterization

qEEG Screening for Clinical Conditions

s9007	Brain maturation process (for ages below 19 years old)
s9008	Brain aging (for ages above 50 years old)
s9009	Possible deviation of brain activity and degree of this deviation from the norm (for ages above 19 years old; mature brain)
s9010	Potential risks of Mild Cognitive Impairment (MCI) / Vascular Dementia (VD) / Alzheimer Disease (AD)
s9011	Potential risks of Attention Deficit/Hyperactivity Disorder (AD/HD) and related diseases
s9012	Potential risks of Depression and determination of affective style
s9013	Potential risks of Anxiety and/or anxious individuality
s9014	Potential risks of Schizophrenia and/or schizotypal individuality
s9015	Potential risks of Alcoholism
s9016	Potential risks of Brain Ischemia (blood insufficiency)
s9017	Potential risks of Traumatic Brain Injury (TBI)
s9018	Potential risks of Post-Concussion Syndrome (PCS)
s9019	Potential risks of Post-Traumatic Stress Disorder (PTSD)

Other services

s9101 - s9104	Comparison with earlier data (1-3 services) - (>10 services)
s9201 - s9202	BrainMind Audit™ -Yoga (EEG screening of the status of brain and mind for those who practice yoga/meditation)
s9203	BrainMind Audit™ (EEG screening of the status of brain and mind)
s9301	Psychopharmacologic response (EEG-guided probabilistic treatment responsivity profile)
